CONVERGE is committed to supporting ethical and rigorous convergence research that seeks to solve pressing social and environmental challenges.

Research Networks

- PHEER: Public Health Extreme Events Research
- SUMMEER: Sustainable Material Management Extreme Events Reconnaissance
- OSEER: Operations and Systems Engineering Extreme Events Reconnaissance
- SIEER: Socially Improved Extreme Events Research
- GEER: Geophysical Extreme Events Reconnaissance
- SSEER: Sustainable Social Science Extreme Events Reconnaissance
- NEER: Natural Hazards Extreme Events Reconnaissance

We coordinate 8 Extreme Events Research / Reconnaissance (EER) networks that bring together natural hazards researchers across disciplinary boundaries.

Our training modules, extreme events research check sheets, and other resources accelerate the education and mentoring of a diverse next generation of researchers.

Our Data Ambassadors program trains social science and interdisciplinary researchers to manage, publish, and reuse research protocols, instruments, and data.

We host regular webinars and virtual forums to help educate and connect members of social science, engineering, and interdisciplinary research communities.
